REPORT OF SUMMARY PLAN INFORMATION

2023 Plan Year

In accordance with ERISA §104(d), the Trustees of the 32BJ North Pension Fund (the “Plan” or “Fund”) are providing the following Report of Summary Plan Information to the unions that represents Plan participants and the employers obligated to contribute to the Plan.

Except as otherwise specified, all information in this Report pertains to the 2023 Plan Year.

1. Contribution Schedule and Benefit Formula Information.

Contributions

The Plan receives contributions in accordance with collective bargaining agreements or participation agreements. The agreements require that employers contribute between \$0.37 per hour and \$600 per month to the Fund for each covered employee.

Benefits

Normal retirement

For Participants who terminated covered employment prior to January 1, 2007, the benefit formula at normal retirement age is the average of the participant’s final three year required contribution rate, multiplied by the applicable Benefit Unit and the participant’s pension service earned under the Plan.

For Participants who work in covered employment on and after January 1, 2007, the normal retirement age benefit is equal to the sum of (i) the Participant’s accrued benefit as of December 31, 2006 calculated pursuant to the formula described in the preceding paragraph, and (ii) the sum of the Participant’s annual accruals for each Plan Year, commencing on and after January 1, 2007, equal to \$6.00 for each \$28 of the monthly employer contribution rate required to be made on the Participant’s behalf, except that for accruals after June 15, 2009, the accrual rate is based on the contribution rate in effect on June 15, 2009. This accrual rate is reduced for participants whose employer contributed under the Default Schedule of the Fund’s Rehabilitation Plan for the 2012 Plan Year.

Effective January 1, 2023, participants who work in covered employment after December 1, 2021 and have a retirement date on or after January 1, 2023 will receive a 10% increase in past accruals. For participants whose last day of work in covered employment was on or after December 1, 2021 and who retired in 2022 will have a 10% increase in past accruals which will be effective with the January 2023 pension payment.

Early retirement

Prior to June 1, 2008, a participant was eligible to receive an Early Retirement Pension beginning at age 62, provided he/she earned at least 10 years of vesting service. Effective June 1, 2008, early

retirement age was reduced from age 62 to age 55, with at least 10 years of vesting service. An Early Retirement Pension is a percentage of the participant's Normal Retirement Pension, based on the participant's age on his/her benefit commencement date.

Disability retirement

An employee who terminates covered employment because of a total and permanent disability and who has 10 or more years of pension service and has reached age 60 may be eligible to receive a disability pension based on his/her pension service earned prior to his/her date of disability, reduced by 6% for each year prior to age 65 that benefit payments began.
